Subject: Condition Petition for Matthew Wells
Date: Monday, November 4, 2019 8:04:25 PM

This message was sent from the Condition page on medicalmarijuana.ohio.gov.

Box was check regarding file size being too large to upload. Action needed!

Name: Matthew Wells
Address: 7437 Madeira Pines Dr, Cincinnati, OH, 45243
Phone: (513) 609-8950
Email: mw719156@sju.edu

Specific Disease or Condition:
Traumatic Brain Injury/Chronic Pain

Information from experts who specialize in the disease or condition.

My neurologist is Dr. Arthur from Cincinnati Children's and my psychologist is Dr. LeJeune also from Cincinnati Children's Hospital. I have a lot of brain damage, and it has been documented that because of this I have somethings wrong with me that without these brain injuries I would be fine. I have never been seen for what feels like the arthritis in my hands from rowing, but I take 2000mg on tylenol almost every day.

Relevant medical or scientific evidence pertaining to the disease or condition.

Have had 2 MRIs and a Physiological evaluation, see the summary of that attached. Chronic pain in hand has no medical evidence to back it up.

Consideration of whether conventional medical therapies are insufficient to treat or alleviate the disease or condition.

I go to therapy 2 times a week already at school and that does not help my physical pain, it helps to talk to someone, but my muscles in my upper body still twitch and the pain in my hands is still there.

Evidence supporting the use of medical marijuana to treat or alleviate the disease or condition, including journal articles, peer-reviewed studies, and other types of medical or scientific documentation.

there is substantial evidence that cannabinoids helps the brain recover and normalizes abnormalities in grey and white matter. Also an anti-inflammatory, I have swollen parts of my brain it would help with that. Also swelling of my finger joints would be alleviated by that, I feel that that is very longstanding evidence and does not need to be uploaded.

Letters of support provided by physicians with knowledge of the disease or condition. This may include a letter provided by the physician treating the petitioner, if applicable.

I have only verbal support from a doctor, it is not written.
