Specific Disease or Condition:

I have been diagnosed with fibromyalgia and my immune system is compromised.

Information from experts who specialize in the disease or condition.

I was diagnosed both at Cleveland Clinic and my doctor at the time Dr. Kalis. I have been on several different prescription drugs and have tried several different ones. I am currently on medication which is not correcting or covering the pain in all parts of my body.

Relevant medical or scientific evidence pertaining to the disease or condition.

Cleveland Clinic several years had a 20 question questionnaire regarding symptoms for fibromyalgia. I had 20 out of 20. Of course, others tests were done. I have also been diagnosed with a compromised immune system and arthritis.

Consideration of whether conventional medical therapies are insufficient to treat or alleviate the disease or condition.

The pain has never been alleviated by the prescriptions I have and continue to take. I am on Social Security Disability since the age of 55 (or close to) and am now 63 years old.

Evidence supporting the use of medical marijuana to treat or alleviate the disease or condition, including journal articles, peer-reviewed studies, and other types of medical or scientific documentation.

I believe the fact that I am on Social security disability that this may be sufficient information. My doctor has retired but I do have paperwork submitted to social security.

Letters of support provided by physicians with knowledge of the disease or condition. This may include a letter provided by the physician treating the petitioner, if applicable.

I do not have a file but do have paperwork submitted to Social Security Disability.
